GEOINFORMATICS FOR SPATIAL-
INFRASTRUCTURE DEVELOPMENT IN
EARTH AND ALLIED SCIENCES**

DECEMBER 9-11, 2010
HANOI, VIETNAM

ABOUT THE UPCOMING SYMPOSIUM

The International Conference on GeoInformatics for Spatial-Infrastructure Development in Earth & Allied Sciences (GIS-IDEAS) is scheduled to take place in Hanoi, Vietnam, 9-11 December 2010. GIS-IDEAS 2010 is being organized in by JVGC and Hanoi University of Mining and Geology (HUMG). GIS-IDEAS 2010 is the fifth in the series of very successful GIS-IDEAS Conferences, with first and second been held in Hanoi, Vietnam in September 2002 and September 2004, the third in HCMC in November 2006 and the fourth in Hanoi in December 2008. The main theme of the GIS-IDEAS 2010 will be **"Envisioning Environmental Security for Sustainable Development"**. GIS-IDEAS Symposium in 2010 not only aims to serve as a forum for scientific exchanges but also as a conduit for technology transfer through tutorial sessions. Further, in order to promote a better understanding of local needs, field excursions and visits to scientific institutes in Vietnam are also being planned. The language of the conference will be English.

CALL FOR SPONSORS & EXHIBITORS

The symposium registration fee will be kept low to allow as many people as possible to participate. This is important in particular for applicants from less well-endowed countries. Special efforts will be made during the symposium to foster technology cooperation amongst developing countries especially in the Southeast Asian region. Funds are needed to cover symposium expenses, provide much needed travel grants and support waiver of registration fee for deserving applicants. To become a sponsor, exhibitor or advertiser contact gidea-office@wgrass.media.osaka-cu.ac.jp.

ABOUT JVGC

The Japan-Vietnam Geoinformatics Consortium (JVGC) was founded in 2001 to develop and promote Geoinformatics applications and foster cooperation in application of Information and Communication Technologies to problems and issues related to our natural and social environment. To achieve these aims, the JVGC:

- Support capacity building through organization of symposia, workshops, seminars, and fieldworks.
- Share information resources and know-how in Geoinformatics
- Support the conduct and implementation of joint research and projects in Geoinformatics
- Promote exchange of information and academic publications
- Develop a human resource network to support development and growth of Geoinformatics
